SERVICE INSTRUCTION no. 2022/06 revision 1 Allowed carabiner types

Cause: Extension of allowed types of carabiners on envelopes and baskets

With reference to: All Kubicek Balloons envelopes and baskets

Action: None, just for information

Kubicek Balloons envelopes and baskets may be equipped with these types of carabiners:

WARNING

It is mandatory to use 40 kN carabiners on some types of envelopes and baskets according to chapter 2.11 of FM.

3592.00 – Envelope / basket karabiner - small - 30 kN (Singing Rock)

3552.00 – Envelope / basket karabiner - small - 38 kN (Petzl)

KUBICEK

217.00 – Envelope / basket carabiner 30 kN (Stubai) - either silver or black version

NOTE

Black version of envelope / basket carabiner (217.00) may suffer by discolouring in areas in touch eyelets of steel wires and fixing points. This discolouring is not considered as damage, if depth is in limits mentioned in MM.

KUBÍČEK

2784.00 – Envelope / basket carabiner 40kN (Stubai)

CAUTION

If is necessary to replace some of carabiners on envelope or basket, it has to be replaced with same type of carabiner, with same product number. Never replace carabiner with other type, even if it has same or higher loading capacity. If suitable carabiner is not available, it is necessary to change whole set of carabiners.

This Service Instruction is adding types of carabiners which are not mentioned in MM rev. 6 (sec. 3.6.11 and 4.11). In next release of MM will be all possible types of carabiners shown in this SI added.

NOTE

For baskets with burner frames K23 and bigger we recommend 40 kN carabiners.

Technical content of this document is approved under the authority of DOA No. EASA.21J.277.
